

Netscape 7 Mail Settings

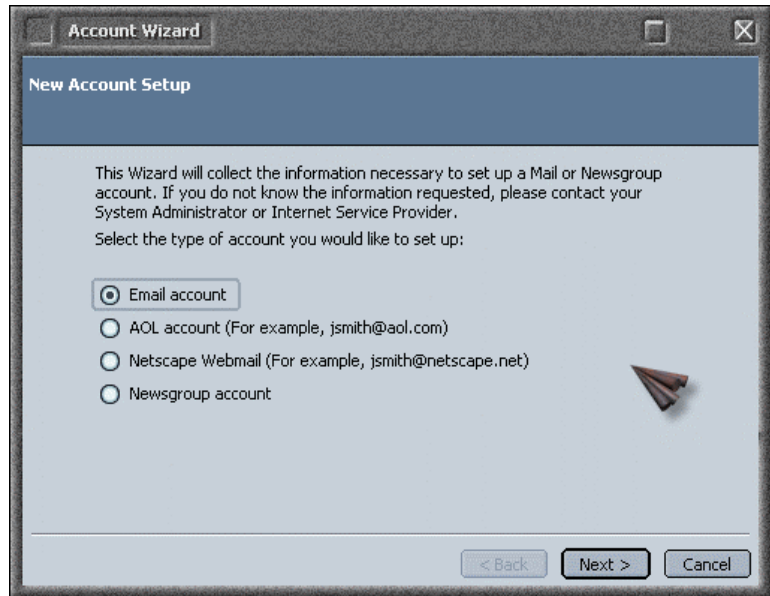

1. Open **Netscape 7 Mail** by opening **Netscape**, clicking on the **Window** menu, and choosing **Mail & Newsgroups**.

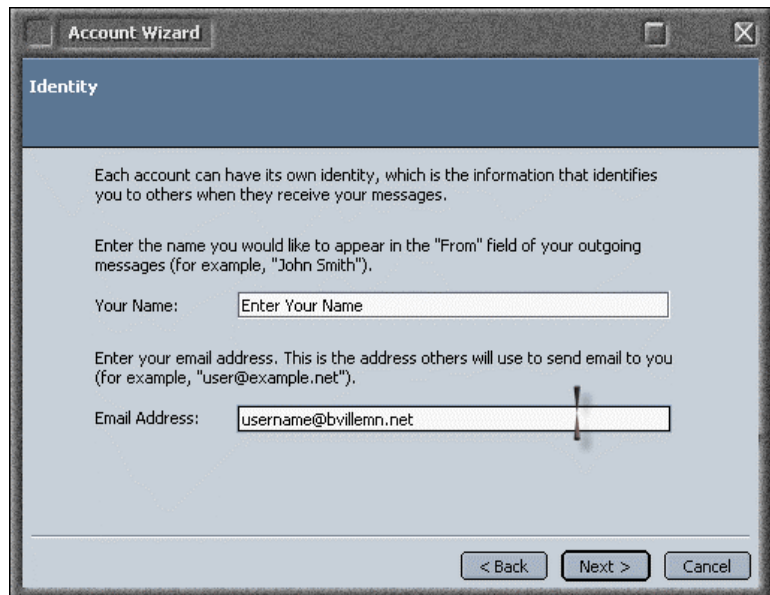

2. Click on the **Edit** menu, choose **Mail & Newsgroup Account Settings...**
3. Click the **Add Account...** button.

4. Select **Email account** and click the **Next** button.

5. Under Identity, enter in **Your Name** followed by your **Email address**.

6. Select **POP**.

7. Enter the *Incoming Server* name of **pop.bvillemn.net**.

8. Enter the *Outgoing Server* name of **smtp.bvillemn.net**

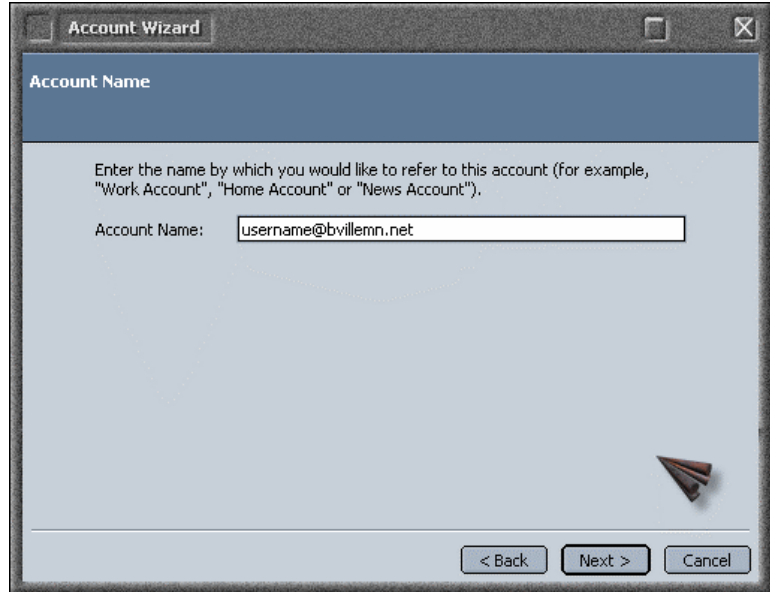

9. Click the **Next** button.

10. It should automatically fill in your *username* from the first part of your email address. Make adjustments if necessary and click the **Next** button.

The image displays two sequential screenshots of the 'Account Wizard' dialog box. The top screenshot is titled 'Server Information' and prompts the user to select the type of incoming server (POP or IMAP), with POP selected. It also asks for the incoming and outgoing server names, which are entered as 'pop.bvillemn.net' and 'smtp.bvillemn.net'. The bottom screenshot is titled 'User Name' and prompts for the user name, which is entered as 'username'. Both screenshots show navigation buttons: '< Back', 'Next >', and 'Cancel'.

11. Enter what you wish to name this account. It is OK to leave this as the default entry of your email address. Click **Next**.

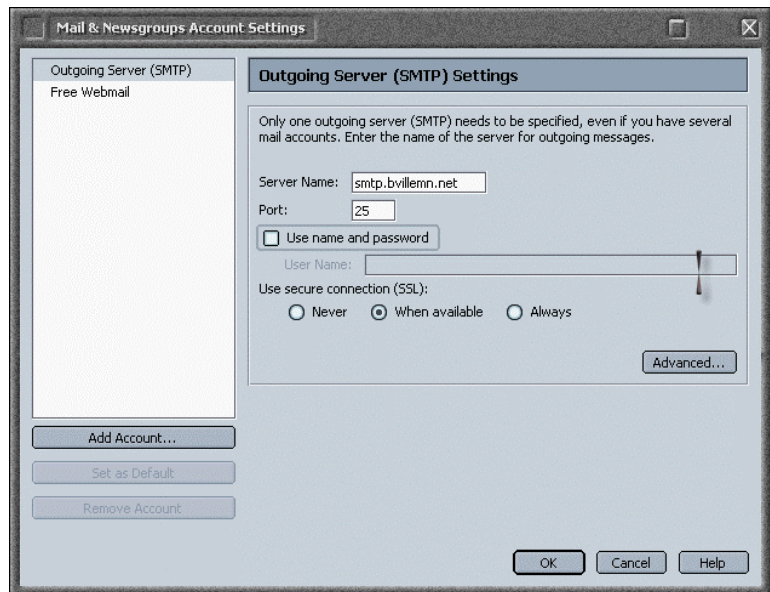

12. Verify your information and click **Finish**.

The screenshot shows the 'Account Wizard' dialog box. The title bar reads 'Account Wizard'. The main heading is 'Account Name'. Below the heading, there is a text box with the instruction: 'Enter the name by which you would like to refer to this account (for example, "Work Account", "Home Account" or "News Account").' The text box contains the value 'username@bvillemn.net'. At the bottom of the dialog, there are three buttons: '< Back', 'Next >', and 'Cancel'.

13. The **Outgoing Server (SMTP)** section is the only other setting you should need to configure. The **Server Name** should be filled in with **smtp.bvillemn.net**

The **Port** should be **25**. **Use name and password** should **NOT** be checked & **Use secure connection (SSL)** should be set to **never**.

The screenshot shows the 'Mail & Newsgroups Account Settings' dialog box. The title bar reads 'Mail & Newsgroups Account Settings'. The main heading is 'Outgoing Server (SMTP) Settings'. Below the heading, there is a text box with the instruction: 'Only one outgoing server (SMTP) needs to be specified, even if you have several mail accounts. Enter the name of the server for outgoing messages.' The text box contains the value 'smtp.bvillemn.net'. Below this, there is a text box for 'Port:' containing the value '25'. There is a checkbox labeled 'Use name and password' which is unchecked. Below this, there is a text box for 'User Name:'. There are three radio buttons for 'Use secure connection (SSL):' with 'Never' selected. At the bottom right of the settings area, there is an 'Advanced...' button. At the bottom of the dialog, there are three buttons: 'OK', 'Cancel', and 'Help'.
